Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is not clear what is intended by "Sachet".

Claim 2 line 2 is confusing "used it only one". For the purposes of examination, it will be assumed —used only once—was intended.

Claim 16 does not describe any structural features pertaining to a "device". For the purposes of examination this claim is best understood as a device having a Methyl red or Bromthymol blue indicator.

Claim 3 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim must refer to claims only in the alternative. See MPEP § 608.01(n). Accordingly, the claim 3 has not been further treated on the merits.

Claims 4-15 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend upon another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4-15 have not been further treated on the merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1743

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 and 16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Witonsky (USP 3,942,467).

Witonsky teaches a shelf life indicator that uses a methyl red indicator. Column 7 between lines 25-30 teaches the methyl red is "0.2" parts by volume which has been read on the claimed range.
